General Campaign Knowledge
(INTERNAL USE ONLY)

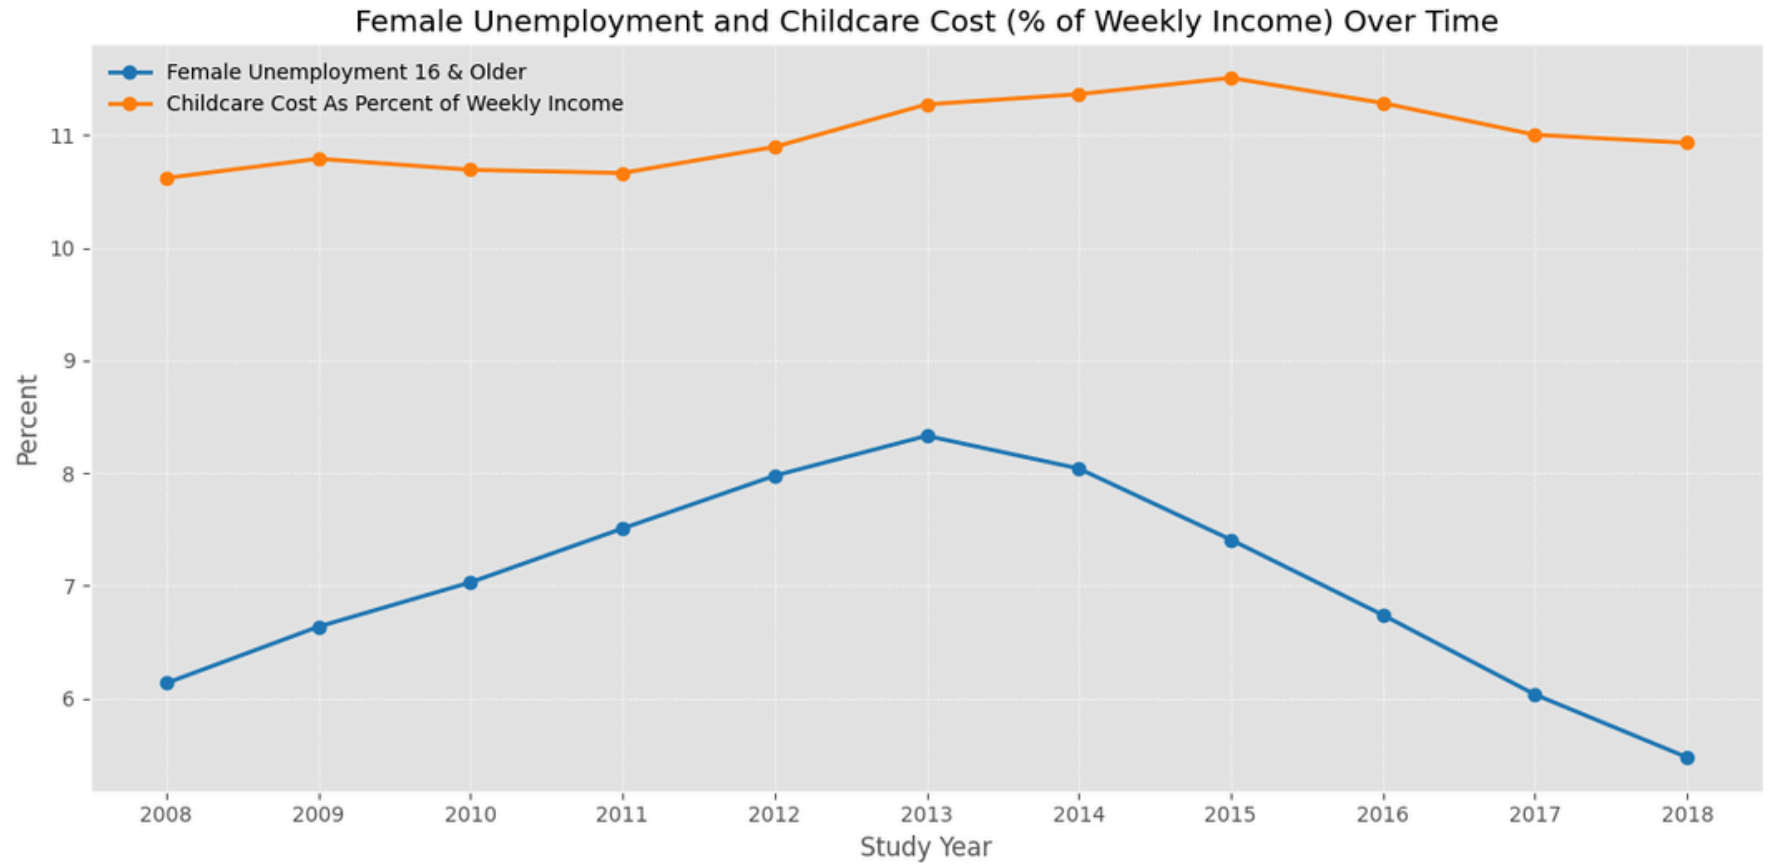

Candidate Bob’s legacy of maintaining childcare costs low relative to incomes is being used as an attack from Candidate PSY. We need to target certain areas to expand our policies while also reasserting the successes of Candidate Bob’s policies!

Memorize these points when presenting Bob’s campaign!

These states have the highest rate of child cost care vs income. We need to prioritize bringing this plan to these states to win their votes!

Candidate PSY is claiming that childcare costs are out of control, but keep the narrative around women! Women unemployment is DOWN and below the percent of childcare cost as part of weekly income!

Childcare costs increase but weekly income also increase! Childcare continues to remain a small portion of median income nationally!
